

High Performance Nylon Hex Standoffs

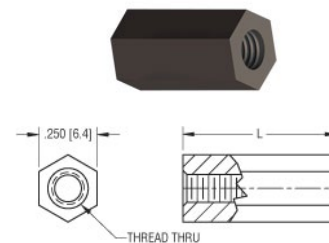

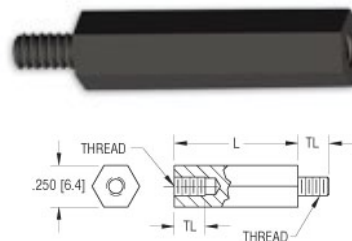

Ideal for Automotive, Aerospace and Extreme Temperature Environments

Material: High Performance Nylon Blend, Black

Operating Temperature: -28°C to 185°C

These high performance nylon standoffs will stand up to harsh conditions such as automotive under hood applications. The standoffs are manufactured with a material that was specifically designed to survive the most extreme conditions. The plastic is designed to stay pliable and maintain its tensile strength in extreme cold and heat.

THREAD	TL (mm)
4-40	6.4
6-32	6.4
8-32	9.5
