| Material: | Nylon |
| Mounting: | THM |
| Type: | Holder |
| UOM: | Sold in units of 100. |

Designed to retain cells securely under shock and vibration, this new holder features a flame retardant UL 94V-0 rated housing and tin plated brass contacts providing low contact resistance and simplified thru-hole mounting on PCB's.

The narrow profile of the holder affords a minimal footprint for high-density PCB packages. This sturdy holder is ideal for PCB battery backup and will accept all major manufacturers' batteries.

Also available are our polarized vertical mount holders.
