

Blind Mount Cable Gland

These unique cable glands are designed for quick and easy installation, especially where a blind-fit is required or where there is insufficient space to use a lock nut inside the application.

These cable glands are often used in refrigeration systems and wherever it is inconvenient or impossible to use a traditional gland with a lock nut, for example close to a corner or in very cramped assemblies.

They come in a range of metric thread sizes from M16 to M32 and three colours - light grey, dark grey and black.

Suitable for panel thickness 1 - 4 mm.

QuickSpecs

Temperature Range	-20°C to +100°C
Material	Polyamide 6/6
Certificate	IP 68
Flamability Rating	UL94-V2
Standard	DIN EN 50262
