

# DualZip

Reusable and single-use 2-in-1 cable ties.

## The Cable Tie, Reinvented

The DualZip cable tie incorporates the dual functionality of both a releasable and permanent tie in one part.

The permanent lock is the time-proven conventional lock, which is so strong that under normal circumstances, the strap will break before there is slippage within the lock.

The releasable lock can be ratcheted and released hundreds of times and will continue to reliably lock. It can be released with just your thumb. The other outstanding difference in this design is that the teeth are on the outside of the bundle diameter. The smooth strap surface being on the inside of the bundle so the releasable action of the lock is outside of the bundle diameter, for easier access to release.

DualZip ties are a natural choice for consumers at the retail level, with many commercial applications for them as well.

<b>Part #</b>	23CTDZ080050
<b>Units / pkg</b>	100
<b>Length</b>	203mm
<b>Width</b>	4.6mm
<b>Material</b>	Nylon 66
<b>Tensile Strength</b>	34kg (permanent) 22kg (releasable)
